What's New

These topics describe the major new features of this product.

New Menu Commands

None.

Miscellaneous new features

None.

What's Changed

Description
The “Start blackout” KM command does not use the PATROL default account anymore. The PATROL agent account is now used to avoid access right issues.
The export configuration feature has been greatly optimized and changed to avoid access rights issues.
New configuration variable “/SENTRY/BLACKOUT1/noPrefix”. When set to ‘1’, no “Blackout: “ prefix will be added to Blackout instance labels.
When a “no threshold” blackout is running, the configuration variable “/SENTRY/BLACKOUT1/configurationAltered” is set to ‘1’ to let users no that the PATROL Agent configuration has been modified.

Corrected problems

Tracking number	Description
	Fixed an issue with the “no thresholds” blackout method that sometimes left empty thresholds in the configuration, preventing the thresholds from the “.KM” file to be set back automatically.
	If the Event Management KM is loaded on the server, the Blackout KM now prevents parameters from being activated during a blackout period of type “no thresholds”. This is done to

Tracking number	Description
	avoid alerts being triggered during a blackout.
	Blackout instance list of 2047 characters or more (extremely large blackouts) were truncated, leading to incomplete blackouts.
	Blackouts of type “no thresholds” and “no collect” can now be applied on the same BMC Performance Manager Monitoring Studio instance at the same time.

Open Issues and Resolutions

None.

Product Documents

The following documents support the product:

- *Blackout Knowledge Module for PATROL by Sentry Software – User Guide*
- *Blackout Knowledge Module for PATROL by Sentry Software – Installation Guide*
- *Blackout Knowledge Module for PATROL by Sentry Software – Reference Guide*
