What's New

Version 1.2.00

These topics describe the new features and enhancements added in this version of *PATROL for HP Data Protector by OTL Software*.

Compatible with BMC ProactiveNet Performance Management v2.8

The BMC Portal integration is rebuilt using the latest SDK for Portal v2.8 and threshold settings are more appropriately configured.

Support for Linux and Windows 2008

The KM is modified to support Linux and Windows 2008 platforms.

Support for BMC Installation Utility

Additional installation files are included in the download to support *Installation Utility*.

Support for HP Data Protector v5.x and v6.x

The KM is modified to support HP Data Protector versions v5.x and v6.x.

What's Changed

Version 1.2.00

These topics describe the changes included in this version of *PATROL for HP Data Protector by OTL Software*.

Product Renaming

The KM is renamed to reflect the HP OmniBack II to Data Protector renaming.

Updated Documentation

The User Guide is updated to describe all the above new features.

Known Issues and Workarounds

This section lists all known issues with this release of *PATROL for HP Data Protector*, and their workarounds.

The *PATROL for HP Data Protector* does not support csh. The KM and Patrol user accounts on UNIX platforms must not be configured to use csh.

If the PATROL Agent version on the managed system is earlier than V3.5.30, PATROL Central Consoles does not display KM icons or images correctly.

If the PATROL Central - Web edition version is earlier than V7.5.50, the context sensitive online help gives an error message.

Corrected Problems

Version 1.2.00

The following problems were reported in earlier releases and have been corrected in this version of *PATROL for HP Data Protector*.

Problem Number	Corrected Problem	New Behavior
3004	KM does not discover database directory	This is related v5/v6 changes in HP Data Protector. Paths are corrected to support these versions.
3005	KM does not discover OmniBack II installation	This is related v5/v6 changes in HP Data Protector. Paths are corrected to support these versions.
3256	Incorrect process monitored as mmd, while the process is down	The process discovery is modified to find exact match.
3257	Some log files are not discovered or monitored automatically	This is related v5/v6 changes in HP Data Protector. Paths are corrected to support these versions.
